

CAREERS AT HAISEA MARINE

HaiSea Marine is a joint venture partnership between the Haisla First Nation and Seaspan ULC. Both partners have considerable experience and knowledge of operating in Northern British Columbia, making HaiSea a natural choice for providing responsible and dependable marine services in the region.

In 2019, Seaspan the signing of a contract award with LNG Canada to design, build and operate escort tugs and harbour tugs required for LNG Canada's LNG export facility in Kitimat, British Columbia.

The contract will last over 12 years and will result in employment for approximately 70 mariners and six onshore staff, plus other roles for employees of the partner organizations.

HaiSea Marine is majority-owned by the Haisla Nation. The agreement with Seaspan ensures Haisla members will have access to employment, training and procurement opportunities on the contract with LNG Canada. Benefits will also be available to the Gitxaala Nation and the Gitga'at Nation through a transit agreement with the Haisla.

During operations, LNG carriers will require harbour tugs to provide berthing and unberthing assistance in Kitimat. The tugs will also provide transportation of material and personnel, marine emergency response, firefighting and oil pollution response. Escort tugs are required to escort LNG carriers from Triple Island to the facility in Kitimat, approximately 159 nautical miles. The tugs are yet to be constructed and will go into service shortly prior to production commencing, which is estimated before mid-next decade.

HaiSea Marine

A Haisla - Seaspan partnership

BE PART OF A WINNING TEAM.

OUR FLEET

ELECRA 2800 – Battery Electric Harbour Tug

DIMENSIONS

- Length Overall - 28.4 meters
- Breadth, moulded - 13.0 meters
- Draft, navigated - 5.90 meters
- International Gross Tonnage - 472

CAPACITIES

- Total battery capacity - 5288 kWh
- Diesel Oil - 101.3 m³

COMPLIMENT

- Crew - 4 persons
- Maximum accommodation - 6 persons

PERFORMANCE

Speed

- Full Speed 12.0-12.5 knots (approx. batteries only)
- Endurance Transit 8.0-10.0 knots (on generators)

Bollard Pull

- 65 tonnes through life
- 70 tonnes (approx.) on batteries at trial
- 35 tonnes (approx.) on generators

RASTAR 400-DF - High Performance Escort Tug

DIMENSIONS

- Length Overall - 40.2 meters
- Breadth, moulded - 15.0 meters
- Draft, navigated - 7.10 meters
- International Gross Tonnage - 496

CAPACITIES

- LNG (gross volume) - 57.0 m³
- Diesel Oil - 324.0 m³

COMPLIMENT

- Crew - 5-6 persons
- Maximum accommodation - 8 persons

PERFORMANCE

Speed

- Full Speed 14.5 knots (approx. batteries only)
- Bollard Pull
- 100 tonnes
